

ViroCell to present at 2024 Cell & Gene Meeting on the Med

Team ViroCell will be attending the Cell & Gene Therapy Meeting on the Med, April 9-11 2024

London, UK and New York, US, 8 April 2024 – ViroCell Biologics (“ViroCell” or the “Company”) announces that John W. Hadden II, Chief Executive Officer, will be presenting at the annual Cell & Gene Meeting on the Med to be held April 9-11 in Rome, Italy. In addition, Farzin Farzaneh, Ph.D., ViroCell’s Chief Scientific Officer, will be moderating a panel discussion at the conference. Both events will be livestreamed globally.

Organised by the Alliance for Regenerative Medicine, the Cell & Gene Meeting on the Med is a three-day conference featuring more than 60 dedicated company presentations by leading public and private companies, highlighting technical and clinical achievements over the past 12 months in the areas of cell therapy, gene therapy, gene editing, tissue engineering, and broader regenerative medicine technologies, as well as over 100 panelists and featured speakers.

The following are specific details regarding ViroCell’s presentation at the conference:

Notes to editor:

ViroCell

www.virocell.com

ViroCell Biologics is an innovation-driven Contract Development and Manufacturing Organisation (“CDMO”) focused exclusively on the design and GMP manufacture of viral vectors for clinical trials. Built around one of the most prolific academic viral vector manufacturing teams, ViroCell was created to address the global demand for precisely engineered viral vectors and aims to become the partner of choice for companies developing cell and gene therapies. The team leverages its deep track record to help clients to de-risk and accelerate novel cell and gene therapies into and through clinical development, with a mission of being the partner of choice for corporate and academic innovators in this field. Focused initially on manufacturing lentivirus and gamma-retrovirus vectors, ViroCell enables clients to start clinical trials on a scalable platform, delivering value by reducing costs, time and regulatory risk.
